

## Numeracy Gr 1

### FLUENCY ACTIVITY: Adding to

#### 10 Materials Needed:

- Deck of cards or print numbers from 1-9 below, 3-4 copies; or use a variety of cards from here:

#### Task Instructions:

Shuffle all the 1-10 cards from a deck of cards (you will need to explain to your student that an A is a 1). Or use 4 copies of the cards below, printed on card stock and shuffled. Lay out 10 cards (two rows of five). Taking turns, players try to make a sum of 10 (the 10 card counts on its own) from 1, 2 or 3 cards. If you can see a 10, you take it and keep it. Replace the cards you took. The winner is the person who makes the most 10's.

This game can be played individually by seeing how fast you can use up all the cards.

Too hard? Use cards 1-5 and play to make 5

Too easy? Use 2-5 cards to make 20
