

Numeracy Gr1 Lesson 2 Number Concepts

Curriculum: Numeracy

Learning Goals:

- visualizing and representing number
- communicating number

Materials:

- Any objects around the house that can be counted—toys, beans, crackers, rocks.
- A deck of playing cards
- An egg carton with the last 2 compartments cut off to make a 10-frame

Activities:

Select a group of objects up to 10. Count the objects.

Group the objects into pairs and count in 2s. (eg. 2, 4, 6..)

Select a group of objects up to 20. Count the objects.

Group the objects into pairs and count in 2s. (eg. 2, 4, 6..)

Group the objects into 5s and count in 5s. (eg. 5, 10...)

Select a group of objects up to 40. Repeat all the steps above.

Use the playing cards (ace=1, 2-10).

Pull a card from the deck. Count and place the number of objects by that card.

Pull another card from the deck. Count and place the number of objects by that card.

Do this 5 more times.
