

## Numeracy Gr1 Lesson 4 - More 10 Frame

Curriculum: Numeracy

### Learning Goals:

- Understanding ways to make 10
- Decomposing 10 into parts (making them into smaller groups)

### Materials:

- 10 Frame 10 Snake from Mindfull Math by Carol Fullerton <https://mindfull.wordpress.com/>

### Activity:

The 10 Frames are coloured in with dots. Look at each of them and write the number that is missing that would make up 10.

(Hint: you know that in one row are 5 squares.)

When you have filled up all the parts of the snake, you've made it.

Have fun.
