

Grade K – Science – Lesson 2 – Observation and Discrimination

Curriculum: Science; Literacy

Learning Goals:

- Make observations is a large part of what scientists do
- Skill of visual discrimination (similar/different) is used for both recognizing alphabet and math patterning

Equipment:

- Print or show the two pdf worksheets (similarities/differences)
- Any item (paper clip, blocks, beads) to be used to place on top of the picture

Activities:

Take a look at each of the images in the 4 blocks.

Find the one picture in the group of 4 that is different. You may have to look very carefully.

Place an object on top of the one that is different. Say why it is different from the others.

What do the others have that are similar to each other?

Answer: there is only one image that is different from each block of 4.
