

Numeracy Gr 3 Oct 5

Activity 2: 1000 Things

Materials Needed:

- paper and pencil

Task Instructions:

This task is quite simple...ask your child to look around your house or outdoors to find 1000 objects of the same type (could be 1000 paper clips, 1000 pennies, 1000 rocks, 1000 beans, 1000 leaves...)

Get them to record how they counted out to 1000 things. Can they group them by 10? How many groups of 10? Can they group them by 100?

How many groups of 100? What was the easiest thing about counting? The hardest?
