Activities
This Week's Focus: The Power of Yet

-Ask: What are two good reasons you should not give up? -What is perseverance? Perseverance is when you continue to do something even though it is difficult for you to do. -Using perseverance and hard work to become better at something is called using your growth mindset. American Psychologist Carol Dweck's theory of growth mindset is about holding the belief that you can learn more or become smarter if you work hard and persevere. Carol Dweck has used the phrase "the power of yet" when talking about growth mindset. Rather than saying "I can't do that" you reframe your thinking by saying "I can't do that YET ". -Listen to The Magical Yet by: Angela DiTerlizzi -What is something you want to become stronger at in your life? In your Weekly Health Journal, draw what you would like to become stronger at. What will you do to persevere with this?
Extension: -Think about a time you wanted to give up but instead persevered by using the magical Yet. Why did you decide to keep trying?
