

**you need:**

- 30 counters
- 1–6 dice

# How many counters?

 for 1 or 2 players (there is no winner)**First of all**

Put 5 counters on each number below.

**Now**

Roll the dice.

You can either:

- take a counter from that number
- or
- say two numbers which add up to your dice-number and take a counter from each of those

**The end of the game**

Go on until you can't take a counter.

How many counters have you won?

Play again and try to get more next time.

**Sample game**

Jess rolled 4. She worked out that  $3 + 1$  make 4.

So she took a counter from 1 and from 3.
