

## Inquiry Question

**Your body digests food on the daily, what are some issues that can arise during this process?**

**Name:** \_\_\_\_\_ **Date:** \_\_\_\_\_

The digestion of food is a process that occurs throughout your body, but what happens when one part of the system fails?

If I am eating cookies with milk and I am lactose intolerant what happens within my body causing a reaction?

In this project you will pick one common digestive problem and answer what is happening within your body that causes it.

## General Instructions

The end goal of this project is to have a brochure of your chosen digestive system problem. Thus, make sure you have all the information you want before placing it on the brochure. Make sure if you add photos you label them as well.

### Materials you'll need:

- Pens, pencils
- Paper 8 1/2 x 11
- Computer with Internet access

### Hints and Ideas:

- Create a brochure similar to one that you might see in a doctor's office, should describe the problems resulting from the disease, its causes, symptoms, and possible treatments
- Title your brochure in the form of a question a patient might have. For Example:
  - "Why do I throw up?"
  - "Why do dairy products make me sick?"
  - "Are you taking antacids every day?"
- Create your brochure by folding an 8 1/2 x 11 inch piece of paper into thirds
- You may use a computer to create your brochure
- Include images with labels, whether you import them from another file or sketch them by hand

### Project submission:

You can either submit your brochure into the project drop box or if you can drop-in to the school, you can present it to your teacher in-person.
