

## Inquiry Question

*What are different ways that I can conserve energy at my house?*

**Name:** \_\_\_\_\_ **Date:** \_\_\_\_\_

Electricity is a common source of energy in our homes.

Electricity is used to power our phones, laptops, fridge, and even our cars sometimes.

We have to be careful about how much energy we use.

How can you save energy at your home?

## General Instructions

Research different ways to conserve energy at your house.

How can you use these strategies?

What are ways you changed your energy consumption?

Use a poster, video, slideshow, or photos to show the changes you make

### Materials you'll need:

- Depends on project format

### Hints and Ideas:

- Here are websites that may help:

BC Hydro conservation quiz:
