

Grade 5 English Language Arts

Week of February 1 – February 5

Lesson 1: Biographies

Different Types of Text

Information comes in many forms:

- Oral texts - speeches, radio, podcasts
- Written text - this is obvious....
- Visual text - posters, timelines, photographs, pictures
- Digital text - online / electronic versions of text

Some of these forms can be combined. Today, you will see how the sequential structure of biographies can be presented in digital text and you will use this information to gather timeline information for one of the people in this lesson.

Biographies

For each person, there are two videos. Watch both videos. Take notes from both videos. Try to keep the notes basically in sequential order, like a timeline.

Complete *Learning From Videos* as you watch the videos about each person.

Each day you will look at a different person:

- Michael Jordan - famous basketball player (who has also done acting and been involved in business).
- Albert Einstein - a scientist that made amazing discoveries whose work is still impacting science and developments today.
- Marie Curie - a Polish-born French physicist famous for her work on radioactivity and twice a winner of the Nobel Prize.

Michael Jordan

Learning From Videos – Michael Jordan

Directions:

1. As you watch the video, on the right-hand side, take notes on the person's life. Don't try to record every detail – just 8 or so main points. See if information is presented sequentially.
2. After you are done, see if you can add headings to the left, in the boxes under "Early Life" to categorize the information.
