

Grade 1 Social Studies: February 22 – February 25 2021

Lesson Focus: The land shapes what we do and where we live.

Materials:

- Internet access to watch the video
- Notebook with crayons

Invitation to Learn:

In this lesson you will learn how the land shapes people and all living things.

Watch this video.

**Types of Land Use.

Ask:

- Who do we share the land with?
- What do you need to think about when you are living in the city?
- What do you need to think about when you are living in rural areas (farmland)?
- We need land for many things. Name some things that land is needed.
- What can we do to take care of the land?

Grade 1 Social Studies: February 22 – February 25 2021

Notebook Time:

Think about all the things that you would want to have near your house. Think of the things that your parents need to do, like going to work or taking you somewhere. Then think about all the things you enjoy doing on the land.

Create a picture of what you would include in your land space.

- Label the items drawn.
- Make your picture colourful so it helps someone to understand what they are seeing.
- Tell someone about your drawing, what you included and why you included them in your picture.
